DATE: _____ TIME: _____

LOCALITY: _____

OBSERVERS: _____

WEATHER: _____ TOTAL SPECIES: _____

This field card is based on the decisions of the Bird Records Committee of the Alabama Ornithological Society as of July 2017. Sightings of species that are Boldfaced or listed as "Hypothetical" should be reported with full written details (a Rare Bird Report, for example). Italicized species often need written details, but these may be brief, listing only the diagnostic points used in the identification. Out-of-season and locally rare birds also should be documented. Reports should be submitted to Greg D. Jackson, 2220 Baneberry Drive, Birmingham, AL 35244, g_d_jackson@bellsouth.net.

Species marked as "B" are known to have attempted breeding in the state. Those listed as "Hypothetical" have sightings with acceptable documentation, but are not validated by physical evidence (specimens or photographs) or have not been verified by several experienced observers. Taxonomy follows the seventh edition of the A.O.U. Check-list of North American Birds (through the 58th Supplement, July 2017).
