FIELD CHECKLIST OF ALABAMA BIRDS

ALABAMA ORNITHOLOGICAL SOCIETY

Date: _____ Time: _____

Locality: _____

Observers: _____

Weather: _____ Total Species: _____

This field card is based on the decisions of the Bird Records Committee of the Alabama Ornithological Society as of January 2022. Sightings of species boldfaced or listed as "Unconfirmed" (formerly "Hypothetical") should be submitted with full written details (and physical evidence such as photos if available). Italicized species often need brief written details listing the diagnostic points used in the identification. Out-of-season and locally rare birds also should be documented. Reports should be submitted to Greg D. Jackson, 2220 Baneberry Drive, Birmingham, AL 35244, g_d_jackson@bellsouth.net or can be submitted through eBird.

Species marked as "N" are known to have attempted nesting in the state. Those listed as "Unconfirmed" have sightings with acceptable documentation, but are not validated by physical evidence (e.g. specimens or photographs) or have not been verified by several experienced observers. Taxonomy follows the seventh edition of the American Ornithology Society's *Check-list of North American Birds* (through the 62nd Supplement, June 2021).

Copies of this field card and additional information may be obtained from the Alabama Ornithological Society website at www.aosbirds.org or by email at Treasurer@aosbirds.org.

Unconfirmed Species

Garganey
Swift, Vaux's
Mountain-gem, Blue-throated
Crane, Whooping
Woodcock, Eurasian
Tern, Roseate
Tern, Arctic
Hawk, Ferruginous
Vireo, Plumbeous
Towhee, Spotted
Grackle, Great-tailed
Warbler, Kirtland's
Warbler, Townsend's

Extinct Species

Pigeon, Passenger
Woodpecker, Ivory-billed N
Parakeet, Carolina
Warbler, Bachman's N

Total Species: 452
